Methodology

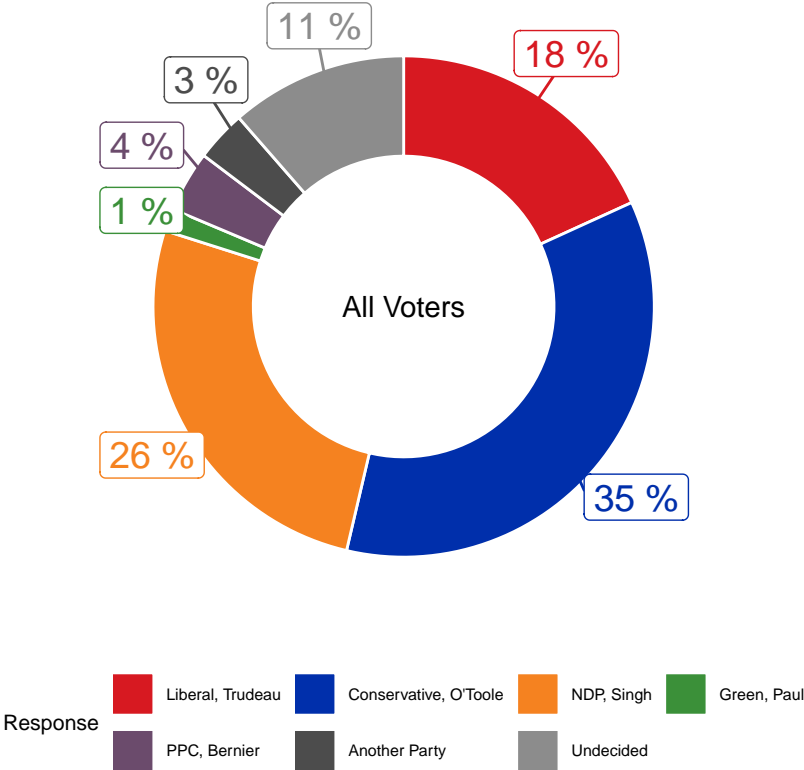

The analysis in this report is based on results of a survey conducted on September 12th, 2021 among a sample of 454 adults, 18 years of age or older, living in the federal electoral district of Edmonton Griesbach. The survey was conducted using automated telephone interviews (Smart IVR) and

online samples. In the case of telephone interviews, respondents were interviewed on landlines and cellular phones. The survey is intended to represent the voting population in Edmonton Griesbach.

As this survey used non-probability sampling to collect this sample, a margin of error cannot be applied to this sample. However, the margin of error for a probability sample of this size would be +/- 4.6% at the 95% confidence level. Margins of error are higher in each subsample.

Totals may not add up 100% due to rounding.
